

Christmas movie choice sheet

Compare one, two or three movies for this evening. Confirm the essentials first, then choose among the movies that fit.

Keep your family notes on your own copy. Do not submit them to this website. Names and personal history are not needed.

1. Fill in your evening's limits, including your viewing province or territory. Use one candidate column for each exact movie copy you are considering. Leave unused columns blank.
2. Check the listing first. With access you already have, privately test required tracks on the actual viewing device and in the mode you will use. Do not buy a movie or begin a timed rental just to check its tracks.
3. For each required option, copy the exact label and mark Confirmed, Unconfirmed, or Unavailable. Write Not needed when an option is not required. A blank essential field is unconfirmed.
4. A known failed requirement means Save for another time. Otherwise, an unresolved essential means Check first. Use Fits tonight only when the runtime fits, access and required tracks are confirmed, the content is acceptable for your family tonight, and any other requirements are met. Do not add up a suitability score.

Our evening

Viewing date

Viewing country

Viewing province or territory

Start time

Desired finish time

Total minutes between start and desired finish

Minutes reserved for getting settled, breaks and expected ads

Movie budget in minutes: finish minus start minus reserved minutes

Required spoken language or regional version

Required subtitle language, or Not needed

Required captions / SDH and language, or Not needed

Required audio description and language, or Not needed

Content concerns for our family (optional, private)

Any other requirement for this evening

How to decide

Fits tonight

Runtime fits; access and all required tracks are confirmed; the content has been reviewed and is acceptable for our family tonight. Any other household requirements are met.

Check first

No known requirement has failed, but an essential is still unconfirmed. A blank essential does not count as confirmation.

Save for another time

At least one known requirement fails for tonight. Other strengths do not cancel it out.

Our plan

First choice

Planned finish

Our agreement about pausing, stopping, or switching

Reason for our choice

Backup (optional)

Optional pause: verified scene cue and approximate time for this exact version; otherwise leave blank

Final decision

Anyone can ask to pause or stop. If no candidate fits, choose an already-checked shorter option or another shared activity. A planned pause does not remove unwanted content.

Fictional worked example

These are invented numbers, not real movie recommendations.

6:30 p.m. to 8:15 p.m. = 105 minutes. Reserve 15 minutes. Movie budget = 90 minutes.

Candidate	Runtime	Decision	Reason
Candidate A	86 minutes	Check first	Required spoken audio is unconfirmed.
Candidate B	102 minutes	Save for another time	Runtime exceeds the 90-minute budget.
Candidate C	78 minutes	Fits tonight	Access and all required tracks are confirmed; the family finds the content acceptable.

An exact 90-minute runtime would fit this budget, with no room beyond the reserved allowance. An unknown runtime needs checking.

Sources and lookup help

Source guidance checked September 28, 2026

- [MPA Canada: Regional film rating systems](#)
- [Consumer Protection BC: Theatrical classification search](#)
- [Alberta: Classification categories and advisories](#)
- [Québec: Classification criteria \(in French\)](#)
- [MPA Canada: Home video ratings for discs outside Québec](#)
